### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

### **DETAILED ACTION**

1. This Office Action is responsive to the RCE and Amendment filed on 7/14/08. Accordingly, claims 1-5, 7-20, 22-27 and 29-32 are currently pending; and claims 6, 21 and 28 are canceled.

### **REASONS FOR ALLOWANCE**

2. Claims 1-5, 7-20, 22-27 and 29-32 are allowed.
3. The following is an examiner's statement of reasons for allowance:

-Regarding independent claim 1, the claim is patentable over Carsello et al in view of Fulghum (previously cited), based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a mobile station comprising: a frequency synthesizer for generating a local oscillator signal, the frequency synthesizer including an electronically tunable reference oscillator; a burst training sequence identifier configured to identify training sequences of bursts in a plurality of slots of a TDMA frame and generate a training sequence identifying signal; and a frequency correction signal generator for generating a control signal for tuning said reference oscillator in dependence on said training sequence identifying signal so as to correct an error in the frequency of said reference oscillator, the frequency correction signal generator operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples.

-Regarding independent claim 9, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or

suggests a mobile station comprising: a frequency synthesizer for generating a local oscillator signal, the frequency synthesizer including an electronically tunable reference oscillator; a burst training sequence identifier configured to identify training sequences of bursts in a plurality of slots of a TDMA frame and generate a training sequence identifying signal; and a frequency correction signal generator for generating a control signal for tuning said reference oscillator in dependence on said training sequence identifying signal so as to correct an error in the frequency of said reference oscillator, the frequency correction signal generator operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples.

-Regarding independent claim 12, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a mobile station comprising: a frequency synthesizer for generating a local oscillator signal, the frequency synthesizer including an electronically tunable reference oscillator; a burst training sequence identifier configured to identify training sequences of bursts in a plurality of slots of a TDMA frame and generate a training sequence identifying signal; and a frequency correction signal generator for generating a control signal for tuning said reference oscillator in dependence on said training sequence identifying signal so as to correct an error in the frequency of said reference oscillator, the frequency correction signal generator operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples.

-Regarding independent claim 13, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a mobile station comprising: a frequency synthesizer for generating a local oscillator signal, the frequency synthesizer including an electronically tunable reference oscillator; a burst training sequence identifying means configured to generate a training sequence identifying signal; and a frequency correction signal generator for generating a control signal for tuning said reference oscillator in dependence on said training sequence identifying signal so as to correct an error in the frequency of said reference oscillator, the frequency correction signal generator operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples, wherein the burst training sequence identifying means is configured to identify the training sequences of the bursts in a plurality of slots of a TDMA frame.

-Regarding independent claim 16, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a method comprising procedures of identifying training sequences in bursts in a plurality of slots of a TDMA frame and generating a training sequence identifying signal; generating a tuning control signal in dependence on said training sequence identifying signal; the generating of the tuning control signal including operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample

of said pair of samples, and applying the tuning control signal to a tunable reference oscillator to perform frequency correction.

-Regarding independent claim 24, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a method comprising procedures of identifying training sequences in bursts in a plurality of slots of a TDMA frame and generating a training sequence identifying signal; generating a tuning control signal in dependence on said training sequence identifying signal; the generating of the tuning control signal including operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples, and applying the tuning control signal to a tunable reference oscillator to perform frequency control.

-Regarding independent claim 31, the claim is patentable over Carsello et al in view of Fulghum, based upon reasons stated REMARKS, pages 11-14, of the Amendment filed on 7/14/08, and is allowed because of following reasons: none of prior art of record teaches or suggests a method comprising procedures of identifying training sequences in bursts in a plurality of slots of a TDMA frame and generating a training sequence identifying signal; generating a tuning control signal in dependence on said training sequence identifying signal; the generating of the tuning control signal including operating upon a pair of samples of one of said bursts, wherein one sample of said pair of samples of said burst is distant from a second sample of said pair of samples, and applying the tuning control signal to a tunable reference oscillator in a frequency synthesizer that provides a local oscillator signal to a mixer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
